

Water Treatment Pack

Comply with Part L

Part L Water Treatment Pack

Premium treatment for domestic hot water & central heating systems

A complete pack to help comply with Part L of the latest Building Regulations.

Pack Includes:

- Magnetic Filter (22mm or 28mm available)
- BM1 Central Heating System Protector (BuildCert Approved)
- BM3 Central Heating System Cleaner
- Electrolytic Scale Reducer (15mm)*

The latest building regulations (1st April 2014), stipulate that measures must be taken to maximise system efficiency and circulation in domestic hot water systems. These include a range of treatment and collection methods. We have put together a simple pack which provides the most effective options for complying with Part L.

* Whilst it is good practice to fit an Electrolytic Scale Reducer in every installation, these are only mandatory in areas where mains water hardness exceeds 200 parts per million.
